

KRISHNA KUMAR

Computer Science Engineering (Big Data Analytics) Student

Patna, Bihar | +91 76319 19235 | krishnakumarkaushal06@gmail.com | LinkedIn: linkedin.com/in/krishnakumar

OBJECTIVE

Motivated Computer Science Engineering undergraduate (Big Data Analytics specialization) with strong programming fundamentals in C, C++, Java, and Python, and working knowledge of SQL, Excel, and data visualization tools. Practical project-building experience across system design, web development, and data analysis. Seeking part-time or freelance data analyst opportunities to apply analytical skills and deliver measurable, data-driven results.

EDUCATION

Ganpat University

B.Tech in Computer Science and Engineering, Big Data Analytics specialization - 2nd Year (Ongoing)

TECHNICAL SKILLS

- Programming Languages: C, C++, Java, Python
- Data Analysis: SQL, MS Excel (Pivot Tables, VLOOKUP, Charts, Formulas), Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA)
- Data Visualization: Power BI, Tableau, Matplotlib, Seaborn
- Python Libraries: Pandas, NumPy
- Big Data Fundamentals: Hadoop, distributed data processing concepts
- Web Development: HTML, CSS, JavaScript
- Other: Video Editing, Prompt Engineering for AI/LLM tools
- Soft Skills: Analytical thinking, quick learner, problem-solving, self-driven project execution

PROJECTS

Movie Ticket Booking System | C

- Developed a console-based movie ticket booking system in C, handling seat selection, booking, and cancellation
- Implemented core logic using arrays and file handling to manage booking records efficiently

Toll Plaza Management System | C++

- Built a toll plaza management system in C++ using object-oriented programming concepts to automate vehicle entry, toll calculation, and record-keeping
- Designed classes and functions to handle different vehicle categories and billing logic

Mental Health Chatbot | HTML, CSS, JavaScript

- Created an interactive front-end chatbot to provide supportive, pre-scripted responses on mental health awareness
- Designed a clean, user-friendly chat interface using HTML and CSS with JavaScript-driven conversation logic

Quiz Marquee - Retro Game-Show Style Trivia Game | HTML, CSS, JavaScript

- Designed and built a self-contained, single-file HTML trivia game with a retro game-show visual theme
- Implemented interactive quiz logic, scoring, and UI animations for an engaging user experience
- Explored Progressive Web App (PWA) techniques to make the game mobile-installable

ADDITIONAL INFORMATION

- Created a curated, formatted resource guide on remote internship portals with practical tips for securing internships
- Enjoys building creative digital projects independently, combining coding, data analysis, and design

DECLARATION

I hereby declare that the information provided above is true to the best of my knowledge.
